

MANUAL – INSTRUCTIONS

PASO A PASO – DO IT YOURSELF

4. VENTILAR

Dejar airear 1 minuto y luego unir por contacto.

4. VENT

Let the glue dry for about 1 minute then apply.

5. APLICAR CALOR

Pegadas ambas piezas, aplicar aire caliente de forma controlada.

5. APPLY HOT AIR

Once both parts are glued in place then apply hot air for 30 seconds.

6. APLICAR PRESION

Utilice cualquier superficie de canto liso y curvo para ejercer presión sobre el parche

6. APPLY PRESSURE.

Using any flat area, apply pressure at least for 5 hours and let dry.

7. EN 24 HORAS

Transcurridas 24 horas se obtiene una adherencia óptima y la piscina se encuentra lista para ser utilizada.

7. AFTER 24 HOURS.

After 24 hours the patch will be totally ready and you can use your inflate a tank.

MANUAL – INSTRUCTIONS

PASO A PASO – DO IT YOURSELF

1. IDENTIFICAR

Identifique el área perforada en la tela, mídala a lo largo y ancho. En su kit de reparación encontrará tela que deberá medir y cortar dejando 3 cm. de excedente perimetral para usar como parche.

1. IDENTIFY THE AREA.

Identify the pierced area, measure it then take the same fabric from the repair kit, cut the patch with a 1 1/2 inch excess size on length and width.

2. LIMPIAR

Limpie la superficie a reparar y el trozo de tela que utilizará como parche. Ambas caras deben estar completamente limpias. Recomendamos lavar las superficies con agua jabonosa y/o pasar una lija fina.

2. CLEAN

Make sure you properly clean both parts, the area on the tank and the patch. We recomend fresh water and soap. Then sand with a fine sandpaper.

3. APLICAR

Aplique capas delgadas de pegamento en ambas caras; sobre el parche y la superficie dañada.

3. APPLY

Apply glue on both parts, the clean and sanded area on the tank and on the patch.
