

CAMPAIGN TENTS

SELF-ASSEMBLING IS

Brand: Inflate A Tank USA

**WITH STRUCTURE
COMPLETELY
INFLATABLE**

USE

Mainly military, AZM shelters, ideal for rescue and humanitarian. High resistance to tearing and traction.

Inflatable modular tent.

Length: 12.50 m, consists of 3 sections (modules) that are connected by zippers (tent skin), locking pins (inflatable structure) and Velcro closures (velcro, floor).

Additional center sections (module 2, center) can be added to increase the length of the tent in steps of 4.80 m up to 17.30 m, 22.10 m and so on.

Minimum length: 7.70 m and is built only with a front and rear module.

SELF-ASSEMBLING CAMPAIGN TENT

Brand: Inflate A Tank USA

Frame

Inflatable tubular structure made of airtight polyester fabric (1100 g/m²) coated on both sides with PVC. Foldable aluminum tubes.

They are used between the eave arches.

tent skin

The tent cover attaches to the inflatable frame using locking pins and hook and loop fasteners to the ground.

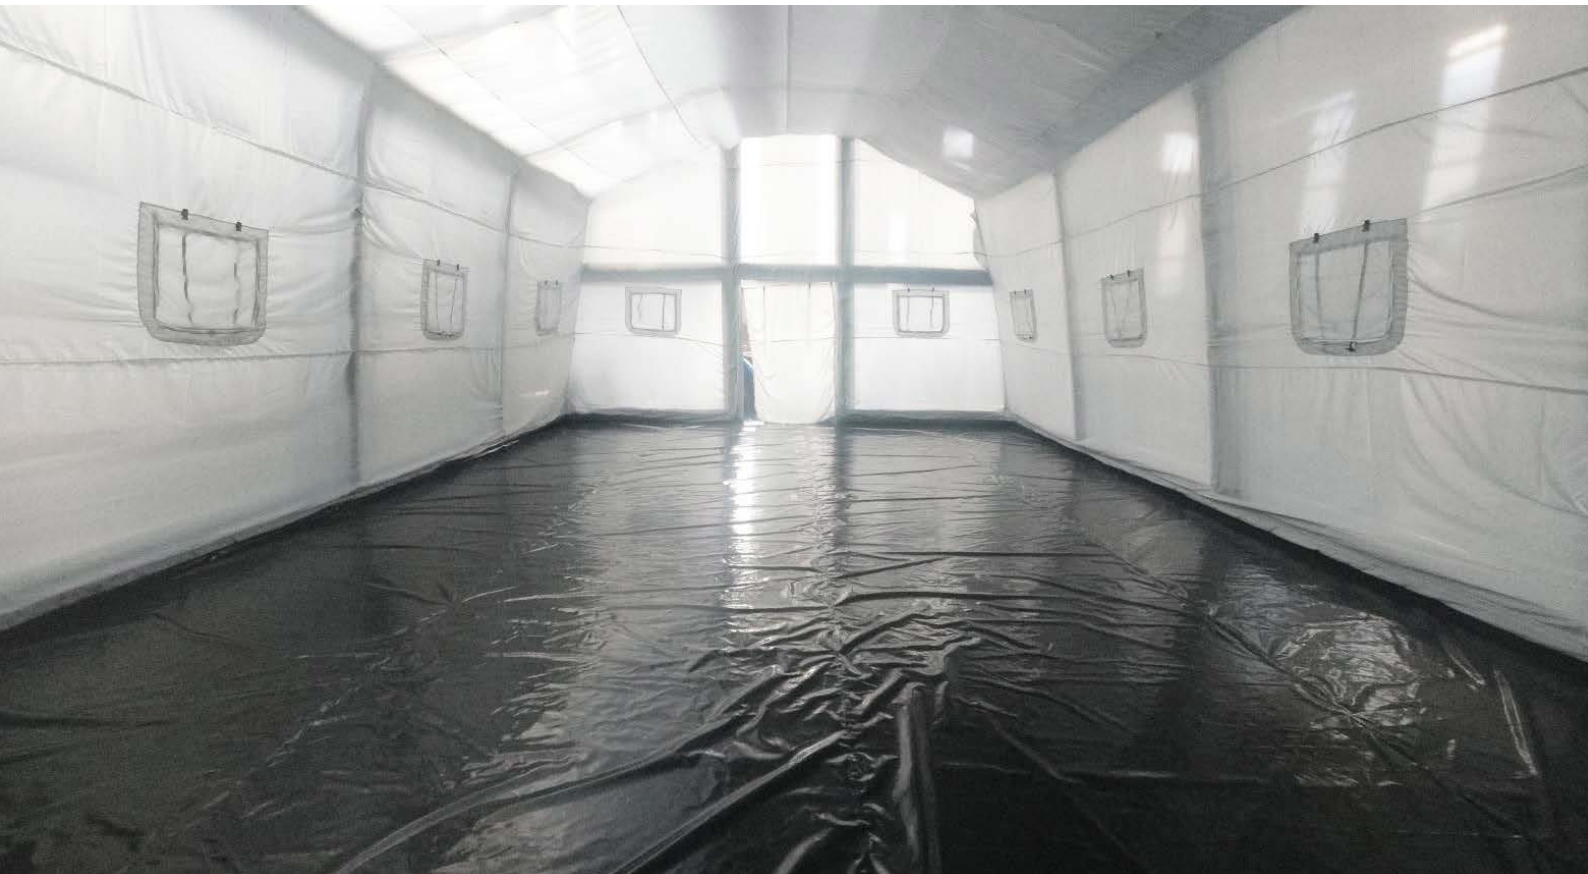

It is made of polyester fabric (700 g/m²) coated with PVC on both sides. The fabric is fireproof, waterproof and rotproof.

Floor

Double-sided PVC-coated polyester fabric flooring (700 g/m²), grey.
